POWER USAGE BEST PRACTICES

Document Your Meter Reading at the Start and End of Season

Take a photo or make a note of your meter reading at the beginning and end of each season. Having your own documented meter readings will allow you to compare your numbers against ours when you receive your power bill at the end of each season.

Check your Meter Monthly

Make it a habit to read your meter monthly to monitor your power usage. Be aware of how much power you're using month to month so if anything seems abnormal you can investigate.

Take the Onus

It is your responsibility to use the amount of power you're willing to pay for. Lakewood does not take responsibility for your usage.

Important for you to Know

- During the winter months security lights will be plugged in to certain sites where the resident's trailer is unplugged. Upon unplugging the security lights in the Spring, we take a meter reading, and this is the new starting reading for that site for the coming season.
- Lakewood does not increase the cost per kWh for our residents in order to make profits. We are only recouping electricity costs that we've already been charged by the electricity provider. For this reason, electricity charges cannot be negotiated.

USE OF PARK DUMPSTERS

Dumpsters are provided at the Park for regular household garbage.

No large miscellaneous items are to be put in or around the dumpsters. ie. appliances, lawn chairs, mattresses etc. These sorts of items need to be taken to the Waste Transfer Site which is located conveniently close to Lakewood. (Across HWY 11A on RR 12).

Leaves or yard trimmings can be bagged and placed beside our dumpsters (not touching the dumpsters). There should never be anything left beside the dumpster other than leaves/yard trimmings.

Cameras are installed at the dumpsters. Any prohibited items that are put at the dumpsters will be returned to your site with possible charges.
